Introduction

Welcome to ITECS — a Dallas-headquartered technology partner serving businesses for over two decades. We deliver managed IT, cybersecurity, cloud hosting, and artificial intelligence services as one integrated practice, so growing organizations get an entire technology department — infrastructure, security, and innovation — from a single accountable partner.

Brian Desmot
CIO & CISO, ITECS

Our clients range from professional services and law firms to logistics operators, manufacturers, and public companies. What they share is a partner that answers, plans ahead, and tells them the truth about risk — before it costs them.

2 decades+

serving Dallas & beyond

Mission and Vision

Mission

To transcend the role of a traditional IT vendor — forging enduring partnerships that deliver customized, adaptive technology solutions. Our commitment to exceptional service, agility, and flexibility ensures timely, relevant, and innovative support for every client's evolving needs.

Vision

To set the industry benchmark for exceptional service — consistently delivering solutions that surpass expectations. We are dedicated to exceeding the standards of our associates, clients, and investors through a steadfast commitment to excellence and high-quality outcomes.

“We're transitioning from managed service provider to managed intelligence provider — ahead of the curve, so our clients stay ahead of theirs.”

Our Practice Areas

Four integrated verticals. One accountable partner.

Managed IT Services

Pages 6–10

Proactive, flat-fee IT management: monitoring, patching, unlimited support, procurement, QBRs, and a dedicated Technical Account Manager at the top tier — your outsourced IT department, priced per endpoint.

Cybersecurity

Page 11

Defense in depth: 24/7 expert-led detection and response, AI-powered email security, MFA, awareness training, recurring assessments, and compliance alignment for regulated industries.

Managed Cloud Hosting

Page 12

Dallas-based private cloud engineered for business applications — ERP, finance, terminal servers — with migration, backup, and disaster recovery handled end to end.

Artificial Intelligence

Pages 13–16

Our flagship practice: AI training, governed agent builds, production-grade line-of-business agents, and ongoing managed intelligence services. Explore the full practice at itecs.ai.

AI-FIRST, SECURITY-ALWAYS: every practice area is delivered under the same governance, documentation, and SOP discipline.

Managed IT Services

Your proactive, flat-fee IT department — priced per endpoint, billed on true count

ITECS operates as your full IT department: we monitor, patch, support, procure, and plan — while you run the business. No hourly billing for support. No tier lock-in. Your invoice follows the actual number of endpoints we manage each month, so costs scale precisely with your headcount.

Coverage Hours

Daylight

8 AM – 5 PM, Monday–Friday

Expert support through the standard working day — the right fit for most professional teams.

Extended

7 AM – 10 PM, every day

Early mornings, late evenings, and weekends covered for operations that run beyond the workday.

24/7

Around the clock

Continuous coverage for operations that never sleep. \$5,000/mo minimum applies.

What Every Program Delivers

Proactive management

Remote monitoring & management with automated patching keeps issues fixed before they interrupt work.

Security-first stack

Next-generation antivirus (XDR) on every managed endpoint, with advanced layers by plan.

People who answer

Assigned technical teams and unlimited support during coverage hours — never a stranger in a queue.

Executive alignment

Quarterly Business Reviews and a dedicated Technical Account Manager on MSP Elite.

Dynamic billing

45 endpoints this month, 40 next? Your invoice reflects the true count — up or down.

Procurement done right

Hardware and software sourcing through our distributor network, quoted transparently.

Contract terms: MSP Select is month-to-month (30-day notice). MSP Pro and Elite offer 1-, 3-, and 5-year terms with a 5% discount on 5-year agreements.

MSP Plans

● Included — Not included “Add-on” Available à la carte

SERVICES	MSP SELECT	MSP PRO	MSP ELITE
Remote monitoring & preventative maintenance	●	●	●
Automated patch management	●	●	●
Next-generation antivirus (XDR)	●	●	●
Unlimited technical support (coverage hours)	—	●	●
Assigned technical team	—	●	●
Technical consulting (excl. special projects)	—	●	●
Quarterly Business Reviews (QBR)	—	●	●
Hardware & software procurement services	—	●	●
Cybersecurity seminars	—	●	●
Dedicated Technical Account Manager	Add-on \$600/mo	Add-on \$600/mo	●
24/7 expert-led managed detection & response (MDR)	—	Add-on	●
AI-powered email security	—	Add-on	●
Multi-factor authentication (MFA)	—	Add-on	●
Security awareness training & phishing simulations	—	Add-on	●
Microsoft 365 backup licenses (storage excluded)	—	Add-on	●
Network monitoring, SIEM & critical-asset alerts	—	—	●
Semi-yearly network & cybersecurity assessments	—	—	●
Quarterly backup & disaster recovery audits	—	—	●
Asset tagging & lifecycle management	—	—	●
Special-project hours included	—	4 hrs/project	15 hrs/project
Contract term	Month-to-month	1 / 3 / 5 yr	1 / 3 / 5 yr

MSP SELECT is our tools-only foundation — RMM, patching, and XDR — pairable with retainer blocks for support. MSP PRO is full-service proactive IT with an à la carte security menu. MSP ELITE includes everything a mature, sophisticated company expects from an internal IT department — fully loaded security, audits, and your own TAM.

MSP Cost Model

Per endpoint, per month — servers*, desktops, and laptops. Volume pricing applies automatically.

MSP ELITE

Quantity	Daylight	Extended	24/7
1–100	\$150.00	\$175.00	\$190.00
101–200	\$142.50	\$161.50	\$180.50
201+	Negotiable	Negotiable	Negotiable

MSP PRO

Quantity	Daylight	Extended	24/7
1–100	\$100.00	\$125.00	\$145.00
101–200	\$95.00	\$118.75	\$128.25
201+	Negotiable	Negotiable	Negotiable

MSP SELECT

Quantity	Per unit / month
1–100	\$45.00
101–200	\$42.75
201+	Negotiable

MONTHLY MINIMUMS

MSP Select	\$315.00/mo
MSP Pro	\$1,500.00/mo
MSP Elite	\$5,000.00/mo
24/7 coverage option	\$5,000.00/mo

Billing Modifiers & Notes

- *Virtual machines: 50% discount per VM endpoint.
- Managed network devices (firewalls, switches, routers, load balancers): \$40.00/unit on Pro, \$75.00/unit on Elite. Wireless access points are supported at no per-device charge.
- Mobile device management (MDM): \$12.50 per device, per month.
- Dynamic billing: each month's invoice reflects the true enrolled endpoint count — grow or shrink freely within your term.
- Every proposal is fully itemized, so you can project costs at any future headcount in seconds.

Retainer & Hourly Model

Prefer on-demand IT over a full-service program? Pre-paid retainer blocks never expire and can be applied to any billable ITECS service — support, consulting, or project management. MSP Select clients buy blocks at a discount.

15-HOUR RETAINER — WITH MSP SELECT

\$2,625

\$175/hr effective · never expires

15-HOUR RETAINER — STANDALONE

\$2,950

\$197/hr effective · never expires

How Hours Deduct

Work level	Deduction
Level 1 — end-user support, cloud platform admin	1.0×
Level 2 — network/system administration, firewalls, policy	1.2×
Level 3 — consulting, strategic guidance, AI expertise	1.5×
After-hours or emergency	1.5×
After-hours + emergency	2.0×

Hourly Rates

Level	Rate
Level 1	\$205/hr
Level 2	\$260/hr
Level 3	\$295/hr

After-hours 1.5× · Emergency 1.5× · Both 2.0×

The retainer is ideal for businesses that want expert access without a full-service commitment: critical projects, on-demand support, or senior consulting — while keeping complete control of IT spend.

Note: MSP retainer blocks apply to IT services. AI engagements are quoted under the AI practice (pages 13–16).

Client Onboarding

From signature to strategic partner in five orchestrated steps — typically inside 30 days.

**1**

Agreement & Welcome

You sign; AP/AR onboarding begins. Your Account Executive sends a welcome email covering exactly what happens next.

2

Kickoff Call

Your Technical Account Manager initiates our New Client SOP: credential gathering, tooling plan, and discovery scheduling.

3

Discovery & Rollout

Onsite or remote discovery of your environment; our stack deploys with QA checks. We coordinate directly with your existing IT to transfer services.

4

Consultation

ITECS reviews your policies and environment, then presents findings and prioritized recommendations.

5

Strategic Partnership

Steady state: proactive management, QBR cadence, and a roadmap that evolves with your business.

No onboarding fee for clients enrolling in MSP Pro or MSP Elite.

Cybersecurity

Defense in depth — monitored by experts, measured by audits, aligned to your obligations

Reputation is your most valuable asset. ITECS layers protection across identity, email, endpoint, and network — then proves it works with recurring assessments and audits. We work with your existing infrastructure brands and flag genuine gaps aggressively.

24/7 Managed Detection & Response

Expert-led MDR: analysts hunt, triage, and respond to threats around the clock — not just alerts.

AI-Powered Email Security

Advanced phishing, impersonation, and business-email-compromise defense ahead of the inbox.

Identity & MFA

Multi-factor authentication and least-privilege access aligned to your applications.

Awareness Training & Phishing Simulations

Your people become the strongest layer — trained, tested quarterly, and measured.

Assessments & Audits

Semi-yearly network and cybersecurity assessments; quarterly backup and DR audits on Elite.

SIEM & Network Monitoring

Critical-asset alerting and security event correlation with in-depth posture insight.

Backup & Disaster Recovery

Microsoft 365 and server backup with tested restore paths — recovery you can rehearse.

Compliance Alignment

CMMC, HIPAA, PCI DSS, and NIST framework experience — including public-company environments.

Not sure where you stand? A baseline risk assessment is the right first step — we document what you're doing well, where the gaps are, and what to fix first.

Managed Cloud Hosting

Dallas-based private cloud for the applications your business runs on

ITECS engineers and operates private cloud infrastructure for line-of-business workloads: ERP and finance applications, terminal servers, databases, and custom systems. Migration, patching, backup, and disaster recovery are handled end to end — with your data on infrastructure we manage, not lost in a hyperscaler queue.

Zero-drama migrations

From on-premises or another provider — planned, rehearsed, and executed with continuity (see the case study on page 17).

Application hosting

ERP, accounting, and terminal-server workloads sized correctly and tuned for multi-user performance.

Disaster recovery

Replication and tested recovery paths, so an office outage never becomes a business outage.

Secured by default

Hardened builds, patch management, backups, and monitoring included in every managed VM.

Transparent Building-Block Pricing (per VM, per month)

Resource	Unit	Rate
vCPU	per vCPU	\$15.00
vRAM	per GB	\$3.00
SSD storage	per 50 GB block	\$5.00
Standard storage	per 50 GB block	\$2.50

MSP CLIENTS

Hosted VMs enrolled in an MSP program are billed at a 50% endpoint discount.

Artificial Intelligence

From Managed Service Provider to Managed Intelligence Provider

AI is not a bolt-on at ITECS — it is a standalone practice, sibling to our MSP vertical, anchored in the security and governance discipline of over two decades of managed services. We are platform-agnostic across the major AI platforms, recommending the right model for each engagement — and where sensitivity requires it, designing locally hosted solutions so your data never leaves your boundary.

FIVE SERVICE LINES — ONE GOVERNED PRACTICE

SL1 — Training & Enablement

AI literacy, executive briefings, power-user coaching, and internal champion programs that make your team productive and safe.

SL2 — Guided & Local Agent Builds

Working agents in your own workspace, built side by side with your employees — training and build in one motion.

SL3 — AI Governance & Security

Readiness assessments, shadow-AI discovery, acceptable-use policy, and deployment reviews before workspace AI goes live.

SL4 — Production & Sophisticated Agents

Engineered line-of-business agents with audit trails, human-in-the-loop review, and SLAs — built in gate-checked phases.

SL5 — Managed Intelligence Services

The recurring layer: adoption retainers, optimization, and agent operations that keep production AI healthy.

AI Training & Agent Builds

Published, transparent pricing. Your employee drives; our specialist architects and coaches.

Training & Enablement (SL1)

Offering	Scope	Fee
Executive AI Literacy Briefing	Half-day private session for board/leadership, industry-tailored	\$4,500
Team AI Workshop	2-hour hands-on group session, up to 12 employees	\$2,900
Power-User Coaching (1:1)	60–90 min individual coaching incl. prep & follow-up	\$650 · 4-pack \$2,400
Internal AI Champion Program	4–6 week curriculum, weekly coaching, project shadowing	\$8,500–\$12,000

Guided & Local Agent Builds (SL2)

Offering	Scope	Fee
Guided Build Session	90-minute 1:1 co-build in your workspace, incl. prep & notes	\$650
Guided Build Sprint (4)	One bounded agent or workflow, typically 2–3 weeks	\$2,400
Guided Build Intensive (8)	Complex multi-step agent incl. testing & refinement	\$4,400
Local Agent Sprint (we build)	One workflow, 1–2 data sources, deployed & documented	\$4,500–\$9,500
Departmental Local Agent	Multi-step, multiple sources/outputs, 30-day tuning window	\$9,500–\$18,000
Data Readiness Sprint	Source-data audit & cleanup for one department or use case	\$3,500–\$8,500

Prepaid Vehicles

Session Bank — 10 \$5,900 \$590/session · shareable · 12-mo term	Session Bank — 20 \$10,800 \$540/session · best per-session economics	AI Retainer — 15 hrs \$3,375 any employee, any mix · 12-mo term
--	---	---

THE VAULT ASSURANCE — every agent we build with you is archived in the ITECS client vault. If the sponsoring employee leaves, we re-wire it for a successor in a session or two — and proven agents can be cloned across departments at a fraction of the original effort.

AI Governance & Security

Your team is already using AI — with or without a policy. We make it governed, visible, and safe.

Engagement	What you get	Fee
AI Readiness Assessment	Current-state audit, shadow-AI exposure, use-case map, platform recommendation, 12-month roadmap, leadership workshop	\$6,500
Shadow AI Discovery & Risk Report	Endpoint and Microsoft 365 scan, risk-ranked findings, remediation playbook	\$5,500
AI Acceptable Use Policy Package	Custom AUP, governance framework, handbook insert, training deck	\$4,500
AI Governance Baseline Bundle	All three above as one 3–4 week engagement (vs. \$16,500 à la carte)	\$14,500
AI Platform Deployment Readiness	Pre-deployment tenant security review before enabling workspace AI: permission hygiene, oversharing remediation, rollout plan	\$8,500–\$15,000

Comparable mid-market governance engagements run \$25,000–\$60,000 at national consultancies. ITECS delivers the baseline at \$14,500 — priced for the SMB and mid-market lane we serve.

Our Data & Governance Commitments

No-training configurations

Enterprise-grade platform setups only — your data is never used to train vendor models and stays in your tenant wherever the platform allows.

Your boundary, your choice

Where sensitivity requires it, we design locally hosted models so data never exits your enclave — a standing practice for legal and regulated clients.

Human-in-the-loop by design

AI output is decision support, not decisions. Every delivered agent routes material outputs through human review.

Least-privilege access

Client-managed credentials, scoped access, and a data processing agreement available on request.

Regulated environments (CMMC/CUI, HIPAA and similar): engagements are custom-scoped on compliance-eligible platforms, with the framework governing the architecture.

Production Agents & MIS

Engineered agents with production obligations — built in phases you gate-check, then operated for you.

Discovery fees credit 100% toward the build. Pilots run on your real data in read-only mode with a human in the loop. Larger builds pay 40/40/20 against milestones you accept.

Phased Build Ladder (SL4)

Phase	Scope	Range
Agent Discovery & Technical Spec	Source review, architecture, risk & human-review model, fixed build quote — credited toward the build	\$4,500–\$7,500
Proof of Concept / Prototype	One source or workflow, limited users, no production SLA	\$8,000–\$18,000
Single-Workflow Production Agent	One primary workflow, deployed, documented, human-in-the-loop	\$18,000–\$35,000
Integrated / Line-of-Business Agent	Multi-source ingestion, reconciliation, audit trail, exception handling — e.g., a purchase-price-variance agent for finance	\$35,000–\$75,000
Multi-Agent System / Process Redesign	Orchestrated multi-agent systems or end-to-end workflow redesign with integrations and monitoring	\$55,000–\$120,000

Managed Intelligence Services (SL5)

MIS Core · up to 10 users

\$1,950/mo

MIS Growth · 11–25 users

\$2,650/mo

MIS Scale · 26–50 users

\$3,500/mo

Adoption retainers include optimization hours, prompt-library maintenance, office hours, and a QBR.

Agent Operations — monitoring, evaluations, drift checks, data refresh, exception triage, and tuning: \$2,500/mo for one production agent · \$4,500/mo for two · \$6,500/mo for three. 4-business-hour response target on production incidents.

AI RATE ENGINE

AI Implementer \$245/hr · AI Specialist \$295/hr · AI Strategist \$375/hr

Case Study

Cross-country relocation for a food manufacturer — zero downtime, still hosted with ITECS today.

The Challenge

A growing food manufacturer needed to relocate operations from Los Angeles to its new plant in Rockwall, TX — without interrupting production, ERP access, or the systems its plant floor depends on.

The Solution

- IT consulting and a rehearsed execution plan for the move
- Servers duplicated into the ITECS Managed Private Cloud
- Uninterrupted access to mission-critical databases and applications
- Disaster recovery coverage throughout the facility move
- Seamless operations while physical servers were in transit

The Results

100%

uptime maintained throughout the transition

0

data loss or downtime during server transport

Ongoing

most applications and databases remain in ITECS hosting today

The engagement has since expanded into AI enablement and agent development — the same partner, growing with the client.

Business references available on request — including this client's leadership.

The ITECS Difference

What working with us feels like — versus what you may be used to

	ITECS	TYPICAL VENDORS
A true partner	Strategic partnership with transparency, flexibility, and dedicated teams — you know your people by name.	A helpdesk queue with rotating representatives and days-to-weeks resolution cycles.
Diverse skillsets	Founded in Dallas over two decades ago; comfortable managing any brand or technology you already own.	Recommends replacing healthy equipment with whatever fits the vendor's preferred stack.
Full service suite	MSP + cybersecurity + cloud + AI under one roof, with fractional CIO/CISO leadership on tap.	Single-lane providers that outsource what they can't staff — or take risks trying it in-house.
Support ecosystem	Courteous experts across the U.S., with pre-vetted, credential-restricted field contractors in most major cities.	Coverage limited to offices within driving distance of a small local team.
AI-ready	A governed AI practice with published pricing and production agents in the field today.	"AI strategy" is a slide, not a service line.

Fractional CIO & CISO

Public-company experience

Nationwide boots on the ground

No technology lock-in

SOP-driven consistency

Dallas HQ — global reach

We are not the cheapest provider — we are the one that keeps clients. Our economics are built on retention through competence, professionalism, and results, not on volume.

Client Testimonials

"We had a tough time keeping and justifying a network admin and decided an outsourced, more flexible option was best. ITECS met me face to face and I was impressed enough to put them to work the next day. Two years in — zero regrets."

JD Hilzendager · COO, ViaOne Services

"ITECS has provided the best IT support we could hope for. Outsourcing our IT to ITECS was the best decision we have ever made. The team is top-notch, deeply knowledgeable, and always there to solve our IT challenges."

Doug Vanderbilt · Director of Development, Crozier & Henderson Productions

"We got hit with ransomware and ITECS recovered our data the same day. We value your managed IT support services and look forward to continuing our partnership."

Bill Squiric · Owner, Ad Pages

"A client of ITECS for over 3 years now. Quick response times, always willing to tailor their service to our specific needs — would highly recommend."

Brendan Orient · Managing Director of Acquisitions, Phoenix Capital
