

Managed IT, Security & AI Readiness Proposal

A managed foundation for SEC-registration readiness, Microsoft 365, and responsible AI adoption

Prepared For	Purpose Capital
Prepared By	ITECS Outsourcing, LLC
Date	July 13, 2026
Valid Through	August 12, 2026

Confidential - prepared for Purpose Capital

Executive Summary

Purpose Capital is preparing for SEC registration while operating a lean, nine-endpoint Microsoft 365 environment across Mac and Windows devices, with mostly iPhone users. At the same time, the firm is already using Claude and ChatGPT, is considering Microsoft Copilot, and has a Snowflake footprint that may support future data and AI initiatives.

ITECS recommends MSP Elite with Extended Coverage as the managed foundation. It combines daily 7:00 AM-10:00 PM support with 24/7 managed threat response, Microsoft 365 email protection and backup, identity controls, security training, governance reviews, and dedicated account ownership. Those capabilities align better with a financial firm that wants to strengthen governance and demonstrate repeatable controls while expanding its use of AI.

MSP Pro with Extended Coverage is included as a lower-cost alternative. It delivers full-service managed IT and responsive support, then lets Purpose Capital select security, backup, identity, monitoring, and strategic services a la carte. The tradeoff is that Purpose Capital must assemble and govern more of the control stack as separate line items.

Recommendation: Select MSP Elite with Extended Coverage. It is the stronger fit for Purpose Capital's SEC-registration readiness, Microsoft 365 security, business continuity, and governed AI adoption. Use MSP Pro Extended only if the immediate priority is a lower base run rate and Purpose Capital is comfortable selecting and managing the additional controls individually.

Proposal at a Glance

9

Managed endpoints

**7 AM-10
PM**

Extended Coverage daily

\$5,000Recommended monthly
base**2/year**

Elite AI orientation sessions

Recommended Approach

Begin with a managed operating foundation rather than treating SEC-registration readiness, cybersecurity, Microsoft 365, and AI as separate projects. MSP Elite establishes the support, security, backup, identity, assessment, and account-governance cadence first. ITECS can then assess Microsoft Copilot readiness, define responsible AI policies, prioritize use cases, and determine whether Snowflake should participate in a governed data workflow. This sequence avoids deploying AI before permissions, oversharing, data ownership, and support boundaries are understood.

Program Comparison

Decision area	MSP Elite Extended - Recommended	MSP Pro Extended	Purpose Capital impact
Coverage	7 AM-10 PM, seven days	7 AM-10 PM, seven days	Same support window
Managed IT	Unlimited support, consulting, assigned team, QBR	Unlimited support, consulting, assigned team, QBR	Both provide full-service IT
Threat operations	Sophos XDR plus Sophos MDR 24/7 expert-led monitoring	Sophos XDR included; MDR optional	Elite reduces separate security decisions
Email and identity	Harmony email security, Duo MFA, training, phishing simulations	Purchased a la carte	Elite creates a more complete control baseline
Data protection	Microsoft 365 and endpoint backup licenses with unlimited storage; quarterly audits	Purchased a la carte; audits separately scoped	Elite supports repeatable continuity evidence
Security governance	Dedicated TAM, semiannual network/security assessments, asset lifecycle management	TAM and tooling optional; assessments separately scoped	Elite provides stronger ownership and review cadence
Special projects	15 hours per special project; 16+ hour threshold	4 hours per special project; 5+ hour threshold	Elite absorbs more bounded project effort
AI benefit	Two annual orientation sessions; 15% eligible Tier 1/2 and one-time SKU discounts	10% eligible Tier 1/2 and one-time SKU discounts	AI delivery remains separately scoped under both
Per-endpoint rate	\$175 per managed endpoint / month	\$125 per managed endpoint / month	At 9 endpoints, calculated usage (\$1,575 Elite / \$1,125 Pro) is below the minimum, so the program minimum sets the base.
Monthly base at 9 endpoints	\$5,000 program minimum	\$1,500 program minimum	Elite prioritizes bundled controls; Pro prioritizes lower base cost

Option 1 - MSP Elite with Extended Coverage (Recommended)

MSP Elite is the recommended program because Purpose Capital's objective is not only responsive support. The firm is also preparing to demonstrate stronger governance, protect Microsoft 365 and endpoint data, improve identity and email controls, and adopt AI without creating unmanaged information risk.

At nine endpoints, the endpoint calculation is \$1,575 per month (9 x \$175), below the \$5,000 MSP Elite monthly minimum. The billed monthly base is therefore \$5,000. Selected mobile-device management, future virtual machines, and separately scoped services may add to that base.

MSP Elite Monthly Investment

Line Item	Quantity	Unit Rate	Total
MSP Elite Extended - 9 managed endpoints; \$5,000 monthly program minimum applies	1	\$5,000.00	\$5,000.00
Recommended monthly base			\$5,000.00

What Elite Bundles

- Preventive monitoring, automated patch management, Sophos XDR, procurement, unlimited support during Extended Coverage, consulting outside special projects, an assigned technical team, and Quarterly Business Reviews.
- Sophos MDR 24/7 expert-led threat monitoring, Check Point Harmony AI email security, Cisco Duo multi-factor authentication, network monitoring/SIEM alerts on critical assets, cybersecurity training, and quarterly mock phishing simulations with remediation training.
- Commvault Microsoft 365 backup and endpoint backup licenses with unlimited storage, plus quarterly backup and disaster-recovery audits.
- A dedicated Technical Account Manager, an assigned four-person MSP Elite team, semiannual network and cybersecurity assessments, and asset tagging/lifecycle management.
- Fifteen included hours per special project; work expected to exceed 16 hours is a special project and hours beyond the allocation are billed under the current professional-services schedule.
- Two AI orientation sessions per contract year, each 30-45 minutes for up to eight employees, plus current Elite benefits for eligible separately purchased AI services.

Source: Elite bundled services are included in the program rate and are not added as separate line items. Mobile device management remains \$12.50 per enrolled device per month. A future virtual machine under Elite Extended is 50% of the endpoint rate, or \$87.50 per VM per month, before any other hosting resources or services. Managed firewalls, switches, routers, and load balancers are \$75 per device per month; wireless access points have no managed-network-device fee.

Option 2 - MSP Pro with Extended Coverage

MSP Pro is a full-service managed IT alternative with the same Extended Coverage window, unlimited technical support during that window, an assigned technical team, consulting outside special projects, procurement support, and Quarterly Business Reviews. It includes Sophos XDR but does not bundle the broader Elite security, backup, identity, assessment, or dedicated-account stack.

At nine endpoints, the endpoint calculation is \$1,125 per month (9 x \$125), below the \$1,500 MSP Pro monthly minimum. The billed monthly base is therefore \$1,500 before selected a la carte services.

MSP Pro Monthly Investment

Line Item	Quantity	Unit Rate	Total
MSP Pro Extended - 9 managed endpoints; \$1,500 monthly program minimum applies	1	\$1,500.00	\$1,500.00
MSP Pro monthly base			\$1,500.00

What Pro Includes Before Add-Ons

- Preventive monitoring and 24/7 system-health alerts through RMM, automated patch management, and Sophos XDR next-generation antivirus.
- Hardware/software procurement services, assigned technical team, Quarterly Business Reviews, unlimited support during Extended Coverage, and technical consulting outside special projects.
- Four included hours per special project; work expected to exceed 5 hours is a special project and hours beyond the allocation are billed under the current professional-services schedule.

MSP Pro A La Carte - Security, Identity & People

Option	Itemized price	Treatment
Dedicated Technical Account Manager	\$600/month	Single accountable IT relationship owner; included in Elite
1Password	\$8/user/month	Business password-management license
Cisco Duo MFA	\$5/user/month	Multi-factor authentication; included in Elite
Quarterly mock phishing campaigns	\$3/mailbox/month	Check Point Security Awareness simulations with remediation training; included in Elite
Sophos MDR - user endpoint	\$20/user/month	24/7 expert-led managed threat response; included in Elite

Option	Itemized price	Treatment
Sophos MDR - server	\$36/server/month	Managed detection and response for a future server

MSP Pro A La Carte - Check Point Harmony Email Security

Option	Itemized price	Treatment
Email Protect	\$4.50/user/month	Email-security tier
Email Advanced	\$6/user/month	Email-security tier
Email Complete	\$7.50/user/month	Email-security tier
Email & Collaboration Protect	\$6.50/user/month	Email plus collaboration protection
Email & Collaboration Advanced	\$8/user/month	Email plus collaboration protection
Email & Collaboration Complete	\$10.50/user/month	Email plus collaboration protection; Harmony email security is bundled in Elite

MSP Pro A La Carte - Backup, Devices & Network

Option	Itemized price	Treatment
Microsoft 365 / Google Workspace backup	\$5/user/month	1-100 users; Commvault license with unlimited storage; included in Elite
Endpoint backup	\$10/endpoint/month	Commvault license with unlimited storage; included in Elite
Mobile device management	\$12.50/device/month	Per enrolled iPhone or other mobile device; quantity TBD
Virtual machine under Pro Extended	\$62.50/VM/month	50% of the \$125 Pro Extended endpoint rate; future server only
Managed network device	\$40/device/month	Firewall, managed switch, router, or load balancer; wireless APs are not charged
Auvik Essential	\$37.50/device/month	Advanced network monitoring option
Auvik Performance with SIEM	\$63/device/month	Performance monitoring with SIEM capability

MSP Pro A La Carte - Testing & Asset Management

Option	Itemized price	Treatment
Penetration/vulnerability testing - 1-50 assets	\$3,790 one-time	Environment test
Penetration/vulnerability testing - 51-100 assets	\$6,890 one-time	Environment test
Penetration/vulnerability testing - 101+ assets	Custom; up to \$30,000	Final amount depends on scope
Sortly asset management - 1-50 assets	\$250/month	Two administrator seats included
Sortly asset management - 51-100 assets	\$485/month	Two administrator seats included
Sortly asset management - 101-200 assets	\$820/month	Two administrator seats included
Sortly asset management - 201-400 assets	\$1,250/month	Two administrator seats included
Additional Sortly administrator	\$15/admin/month	Optional additional administrator seat
Teramind	\$20-\$50/user/month	Employee activity/risk monitoring; price depends on selected license features

Source: The \$1,500 Pro base includes no selected a la carte quantity. Add-ons are billed only after Purpose Capital confirms products and counts. Sophos XDR is excluded from this catalog because it is already included in Pro. Cybersecurity awareness training beyond the priced phishing/remediation service, quarterly backup/DR audits, semiannual network/security assessments, the four-person Elite team, and other Elite-only governance services have no current standalone catalog price and are not presented as selectable Pro line items.

Copilot and AI Enablement Path

1 Secure the M365 foundation	2 Assess Copilot readiness	3 Prioritize governed use cases	4 Pilot, measure, and expand
-------------------------------------	-----------------------------------	--	-------------------------------------

How ITECS Can Help

- Review Microsoft 365 permissions, oversharing, sensitivity labeling, conditional access, and pilot requirements before enabling Microsoft Copilot broadly.
- Create an AI governance baseline for approved tools, acceptable use, data handling, human review, ownership, and audit evidence across Copilot, Claude, ChatGPT, and future platforms.
- Inventory Snowflake data and permissions, prioritize governed use cases, and separately scope data readiness, guided builds, or production agents only where warranted. AI delivery remains outside MSP unlimited support and MSP project-hour allocations.

MSP-Linked AI Benefits

Benefit	MSP Elite	MSP Pro
Complimentary AI orientation	2 sessions per contract year	Not included
Eligible Tier 1/2 AI hourly discount	15%	10%
Eligible one-time AI SKU discount	15%	10%
Eligible production-agent build discount	15%, subject to current quoting rules	No build discount
Managed Intelligence onboarding	First month waived up to \$2,500 on annual terms	No onboarding waiver

Future Server and Data-Center Readiness

Purpose Capital does not currently need a server. If a future application, AI workload, Snowflake integration, or data-governance requirement changes that, ITECS can scope a managed virtual or dedicated server from confirmed compute, memory, storage, operating system, access, backup, resilience, and recovery requirements. A managed virtual machine is treated as 50% of the applicable MSP endpoint rate before separate hosting resources or licenses; dedicated infrastructure requires a separate design and service order.

Commercial and Service Notes

Item	Current treatment
Contract term	MSP Pro and MSP Elite offer 1-, 3-, or 5-year terms; final term is TBD.
Five-year discount	With a signed 5-year term, a 5% discount applies to the monthly program minimum, reducing MSP Elite from \$5,000.00 to \$4,750.00 per month and MSP Pro from \$1,500.00 to \$1,425.00 per month.
Non-renewal notice	60 days for MSP Pro and MSP Elite.
Support targets	Critical response within 1 hour; standard response within 4 hours.
Endpoint quantity	Exactly 9 for this proposal. The final service order confirms the device inventory.
Not included in base	Mobile devices, future servers/VMs, managed network devices, selected Pro add-ons, third-party AI subscriptions, and separately scoped AI/data work.
Regulatory boundary	ITECS supports technology controls and evidence; Purpose Capital and its advisors retain responsibility for SEC/legal interpretation and compliance conclusions.

Next Steps

- Confirm whether Purpose Capital wants to proceed with MSP Elite Extended or use MSP Pro Extended as the commercial baseline.
- Complete a short service-order inventory: nine managed endpoints, mobile devices, Microsoft 365 licensing, network devices, backup selections, and contract term.
- Schedule a proposal walkthrough with Nate and the appropriate compliance, technology, and budget stakeholders.
- If Copilot is a near-term priority, authorize a separate readiness-scoping discussion focused on permissions, data governance, pilot users, and Snowflake use cases.
- Questions or ready to proceed? Contact Brian Desmot at bdesmot@itecsonline.com or (214) 444-7884.

Assumptions

- Pricing uses exactly 9 managed endpoints, as directed by ITECS. The final service order will confirm device type, operating system, user-to-device assignment, and whether any additional endpoint is in scope.
- No mobile-device, virtual-machine, managed-network-device, backup, email-security, or other a la carte quantity is included in the base monthly totals unless stated; those quantities remain to be confirmed.
- The MSP Elite and MSP Pro monthly program minimums control at the current 9-endpoint quantity. With a signed 5-year term, a 5% discount applies to the monthly program minimum, reducing the base to \$4,750.00 for MSP Elite and \$1,425.00 for MSP Pro.
- Purpose Capital's SEC-registration obligations and required controls will be interpreted by Purpose Capital's legal and compliance advisors. ITECS provides technology operations, security controls, documentation, and evidence support, not legal advice or regulatory certification.
- Microsoft Copilot, Claude, ChatGPT, Snowflake, and other third-party subscriptions are client-paid direct costs unless a later signed service order states otherwise. Copilot deployment, AI governance, Snowflake/data work, and future virtual or dedicated server hosting require separate discovery and written scope.
