

STRATEGIC IT PARTNERSHIPS FOR OPERATIONAL EXCELLENCE

Managed Services Proposal

Prepared for Star Sleep & Wellness

Attention: Taylor Fortney
Vice President of Operations

May 22, 2026

Proposal Reference: ITECS-2026-SSW-001

ITECS Outsourcing, LLC

Founded in Dallas, 2002 | Plano, Texas | itecsonline.com

Proposal Summary

Prepared For	Star Sleep & Wellness — Attn: Taylor Fortney, Vice President of Operations
Prepared By	Brian Desmot, Founder & CIO — ITECS Outsourcing, LLC
Proposal Date	May 22, 2026
Valid Through	June 30, 2026
Proposal Reference	ITECS-2026-SSW-001
Recommended Program	MSP Elite / Extended Coverage / Multi-Year Term Options

Executive Summary

Star Sleep & Wellness is a Dallas-founded, rapidly expanding specialty medical practice with an established Dallas–Fort Worth presence, active operations in North Carolina, and a clear path toward a 20-plus-location national footprint over the next 18 to 24 months. The organization operates as a Management Services Organization with strong cultural focus on patient care, a tightly run HIPAA compliance program, and an internal systems team building real technical capability around data integration, automation, and analytics.

Following our discovery conversation on May 22, 2026, ITECS recommends transitioning Star Sleep & Wellness onto the MSP Elite program with Extended coverage. This recommendation directly addresses the priorities surfaced during discovery: identity and access modernization, asset visibility, lifecycle hygiene, multi-site backup and connectivity resilience, a true co-managed operating model that empowers your internal field technician, and an experienced healthcare-IT partner positioned to scale alongside your growth.

This proposal includes a fully itemized recurring monthly investment, a fixed-fee onboarding bundle, side-by-side term options, a recommended Phase 1 project roadmap, and the operating commitments ITECS makes to every Elite client. All pricing is based on the asset profile discussed during the call and will be trued up within plus or minus fifteen percent following the formal asset inventory completed during onboarding.

Understanding Your Priorities

Based on our May 22 conversation, ITECS heard the following strategic priorities driving Star Sleep & Wellness's evaluation of a new managed services partner:

- **Identity and access modernization.** Establish enterprise single sign-on and enforced multi-factor authentication. Move away from application-by-application access management, which does not scale at 250 employees and a growing national footprint.
- **Asset visibility.** Maintain an accurate, accessible inventory of servers, endpoints, and network devices that leadership and internal IT can query at any time.
- **Lifecycle hygiene.** Tighten employee onboarding and offboarding so terminated users lose access to licenses and devices on a defined timeline, every time.
- **Backup and resilience.** Verify that contracted backup internet circuits are in place and operational at every location, and that data backups across servers and Microsoft 365 are configured, retained, and regularly tested.

- **Co-managed operating model.** Empower your internal field technician with appropriate access to the Microsoft 365 tenant, ticketing, and tooling so that internal and external resources operate as one integrated team.
- **EHR transition support.** Support the Athena Health pilot and potential enterprise migration without introducing IT-side blockers.
- **Pace of change.** Execute meaningful change in a consolidated push rather than a prolonged trickle, while remaining mindful of organizational change capacity.
- **Responsible AI adoption.** Continue deploying AI capabilities with appropriate governance and a measured rollout that does not introduce HIPAA or operational risk.

Recommended Solution: MSP Elite, Extended Coverage

MSP Elite is ITECS's premium managed IT and security program. It is purpose-built for organizations like Star Sleep & Wellness — regulated, multi-site, and growing — where security, compliance, and operational consistency are non-negotiable.

MSP Elite delivers the unified, always-on operating model discussed during the call. The 24/7 Sophos managed detection and response capability protects the environment around the clock. Cisco DUO multi-factor authentication and Check Point Harmony email security harden the identity and email attack surfaces. Veeam-powered backup with quarterly recovery audits protects clinical and business data. A dedicated Technical Account Manager provides a single accountable point of contact, and a four-person Elite team becomes deeply familiar with your environment over time.

Extended coverage (7:00 AM – 10:00 PM CT, seven days per week) is recommended as the headline plan because it cleanly covers daytime clinical operations across every U.S. time zone where Star Sleep & Wellness has contracted virtual employees, while Sophos MDR provides true 24/7 security monitoring underneath. A 24/7 coverage upgrade is available at any time should after-hours general IT support become a priority.

Included MSP Elite Services

Service	Included in MSP Elite
Sophos MDR — 24/7 expert-led threat monitoring and response	Included
Sophos XDR Next-Generation Antivirus	Included
Cisco DUO Multi-Factor Authentication for all users	Included
Check Point Harmony AI Email Security for Microsoft 365	Included
Cybersecurity awareness training and quarterly phishing simulations	Included
Network monitoring, SIEM, and critical-asset alert notifications	Included
Commvault-powered Microsoft 365 backup with unlimited storage	Included
Endpoint backup (Windows / macOS / Linux) with unlimited storage	Included

Service	Included in MSP Elite
Quarterly backup and disaster recovery audits	Included
Preventative maintenance and patch management (RMM)	Included
Procurement services for hardware and software	Included
Assigned MSP Elite team of four dedicated IT experts	Included
Dedicated Technical Account Manager	Included
Quarterly Business Reviews (QBRs) and strategic planning	Included
Semi-annual network and cybersecurity assessments	Included
Asset tagging and lifecycle management	Included
Unlimited technical support during coverage hours	Included
Technical consulting (excluding special projects)	Included
15 project hours included per Special Project	Included

MSP Plan Comparison: Elite vs Pro + À La Carte

A reasonable question for any organization evaluating MSP Elite is whether a lower-tier program plus à la carte add-ons could deliver equivalent value. The comparison below uses Star Sleep & Wellness's actual asset profile (150 endpoints, 8 servers, 15 managed network devices) and prices MSP Pro with the add-ons required to match Elite's security, identity, and backup posture.

Monthly Investment Comparison

Line Item	MSP Pro + À La Carte	MSP Elite (Recommended)
Endpoint management — 150 endpoints	\$17,812.50	\$24,225.00
Server / VM management — 8 servers	\$475.00	\$646.00
Managed network devices — 15 devices	\$600.00	\$1,125.00
Sophos MDR — endpoint 24/7 SOC (150 users)	+ \$3,000.00 add-on	Included
Sophos MDR — server protection (8 servers)	+ \$288.00 add-on	\$288.00
Cisco DUO Multi-Factor Authentication (150 users)	+ \$750.00 add-on	Included
Check Point Harmony AI Email Security (150 users)	+ \$825.00 add-on	Included

Line Item	MSP Pro + À La Carte	MSP Elite (Recommended)
Commvault Microsoft 365 Backup (150 users)	+ \$525.00 add-on	Included
Endpoint backup — Windows / macOS / Linux (150)	+ \$1,500.00 add-on	Included
Recurring Monthly Subtotal	\$25,775.50	\$26,284.00
Monthly Differential vs MSP Pro + Add-Ons	(baseline)	+ \$508.50 / mo

On hard recurring pricing, MSP Pro plus the necessary à la carte add-ons lands within \$508.50 per month of MSP Elite. The differentiation between the two programs is not the monthly subtotal — it is what MSP Pro cannot match at any price, and the project hour economics outlined below.

Monthly Recurring Investment — Same Outcome, Different Construction

Pro requires six add-on layers to reach equivalent security and backup coverage; Elite delivers them as one unified program.

Figure 1. Pro must assemble six discrete add-ons to reach equivalent coverage; Elite delivers the same outcome as one bundled program.

Strategic Services Available Only Under MSP Elite

The following services are core to MSP Elite and are not available as à la carte add-ons under MSP Pro. They represent the strategic, advisory, and assurance layer that distinguishes a premium managed engagement from a bundled-tools relationship.

Strategic Service	MSP Pro	MSP Elite
Dedicated Technical Account Manager	—	Included
Four-person assigned Elite team	—	Included
Semi-annual network & cybersecurity assessments	—	Included
Quarterly backup & disaster recovery audits	—	Included

Strategic Service	MSP Pro	MSP Elite
Asset tagging & lifecycle management program	—	Included
Network monitoring, SIEM & critical-asset alerts	—	Included
Cybersecurity awareness training & phishing simulations	—	Included
Loyalty discount on Special Project overage rates	10%	15%
Special Project hours included per project	4 hrs	15 hrs

Project Hour Economics

MSP Elite includes 15 hours per Special Project versus 4 hours under MSP Pro. Applied to the Phase 1 roadmap (six discretionary projects totaling approximately 106 hours at the midpoint estimate), the difference produces a material reduction in billable project work and a higher loyalty discount on any overage hours.

Phase 1 Roadmap Effort (6 projects, midpoint estimate)	MSP Pro	MSP Elite
Estimated total project hours (midpoint, post-reduction)	106 hrs	106 hrs
Project hours included free (per tier × 6 projects)	24 hrs	90 hrs
Billable overage hours	82 hrs	16 hrs
Approx. project investment (Level 2 rate + tier loyalty)	\$19,188.00	\$3,536.00
MSP Elite advantage on Phase 1 alone		\$15,652.00 saved

Year 1 Total Cost — Recurring + Phase 1 Project Work

MSP Elite's 15 free project hours per Special Project recover the recurring premium and then some.

Figure 2. Year 1 total cost — Elite's 15 free project hours per Special Project absorb the recurring premium and produce a net advantage of \$9,550.00.

Year-1 net picture: the +\$6,102.00 annual recurring investment in Elite is offset by approximately \$15,652.00 in saved Phase 1 project costs, resulting in MSP Elite being roughly \$9,550.00 less expensive than MSP Pro + add-ons across the first twelve months — before accounting for the strategic services that MSP Pro cannot provide.

Recurring pricing comparison uses current published ITECS rates: MSP Pro Extended endpoint rate of \$118.75 (101–200 band), MSP Elite Extended endpoint rate of \$161.50 (101–200 band), and the standard à la carte rates for Sophos MDR (\$20 user / \$36 server), Cisco DUO MFA (\$5), Check Point Harmony Email Security (\$5.50 midpoint), Commvault M365 Backup (\$3.50 per user at 101+ users), and Endpoint Backup (\$10). Project hour estimates use Level 2 standard rate of \$260 per hour with the applicable tier loyalty discount.

Recurring Monthly Investment

Based on the asset profile discussed during our May 22 call, the recommended monthly recurring investment is detailed below. Final asset counts and the corresponding monthly investment will be trued up following the formal asset inventory completed during onboarding, within a plus or minus fifteen percent variance from the figures shown here.

Description	Qty	Unit Rate / Month	Monthly Total
Managed Endpoints (Windows / macOS workstations)	150	\$161.50	\$24,225.00
Servers / Virtual Machines (50% of endpoint rate)	8	\$80.75	\$646.00
Managed Network Devices (firewalls, managed switches, routers, load balancers)	15	\$75.00	\$1,125.00
Sophos MDR — Server Protection	8	\$36.00	\$288.00
Recurring Monthly Investment — Extended Coverage			\$26,284.00

All MSP Elite services listed in the Included Services table above are bundled into the recurring monthly investment. No additional charges apply for the Sophos MDR endpoint coverage, Cisco DUO MFA, Check Point Harmony email security, Commvault M365 backup, endpoint backup, cybersecurity training, quarterly phishing simulations, or the dedicated Technical Account Manager. The Sophos MDR Server line item above adds dedicated 24/7 expert-led threat monitoring to each managed server in the environment.

Note on managed network devices: per ITECS policy, the Managed Network Device fee applies only to firewalls, managed switches, routers, and load balancers. Wireless access points are monitored and supported under the program at no additional per-device charge.

Term Options

ITECS offers three initial term lengths. All three include the full MSP Elite scope of services. The 5-year term reflects a 5% reduction in endpoint pricing and is recommended as the best long-term value for an organization with Star Sleep & Wellness's growth trajectory and partnership orientation.

Term	Endpoint Rate	Monthly Investment	Annual Investment	Total Contract Value
1 Year	\$161.50	\$26,284.00	\$315,408.00	\$315,408.00
3 Years	\$161.50	\$26,284.00	\$315,408.00	\$946,224.00
5 Years (Recommended)	\$153.42 (5% off)	\$25,072.75	\$300,873.00	\$1,504,365.00

Five-year savings versus annual renewal at the 1-year rate: \$72,675.00 over the contract life.

Auto-renewal occurs at the end of the initial term unless either party provides 60 days' written non-renewal notice. Standard renewals carry forward at the then-current pricing.

Onboarding and Transition Bundle

ITECS proposes a fixed-fee, one-time onboarding bundle to fully transition Star Sleep & Wellness onto our managed services platform within approximately 30 days of contract execution. The bundle covers the full transition scope, including coordination with the incumbent provider, and avoids hourly-billing surprises during the most operationally sensitive phase of the relationship.

Onboarding Workstream	Est. Hours	Service Level
Environment discovery, documentation, and topology mapping	6	Level 3
Asset enrollment — endpoints, servers, network devices	—	Included in MSP Elite
Tool stack deployment (RMM, EDR, MDR, M365 backup, endpoint backup)	—	Included in MSP Elite
Initial HIPAA-aligned cybersecurity baseline and gap analysis	8	Level 3
Backup posture verification and BCDR baseline test	6	Level 2
Co-managed access setup for internal field technician	—	Included in MSP Elite
Incumbent provider handoff coordination and credential transfer	—	Included in MSP Elite
Runbook authoring and internal knowledge base build-out	—	Included in MSP Elite
Onboarding Bundle — Fixed Fee (One-Time)	20	\$5,500.00

ITECS will work professionally and cooperatively with the incumbent provider throughout the handoff. All data, documentation, and access remain the property of Star Sleep & Wellness at all times. A documented playbook of milestones, deliverables, and acceptance criteria will be shared at kickoff so Star Sleep & Wellness leadership has complete visibility into the transition.

Recommended Phase 1 Project Roadmap

The following discretionary projects directly address the strategic priorities identified during discovery. Each will be scoped via a separate Statement of Work after onboarding, with formal hour estimates replacing the planning-grade ranges shown here. As an MSP Elite client, Star Sleep & Wellness receives the first 15 hours of every Special Project at no additional cost; hours beyond that allocation are billed at the rates shown in the Hourly Rates section, with a 15% loyalty discount on overage rates applied to Elite clients.

Project	Business Outcome	Est. Hours
Identity & Access Modernization (Entra ID + Cisco DUO MFA)	Enterprise SSO, enforced MFA across all users, conditional access policies	22 – 35 hours
Microsoft 365 Tenant Hardening & Lifecycle Workflow	Automated onboarding/offboarding, license audit, Intune baseline, terminated-user remediation	11 – 17 hours
Athena Health Migration — Network & Identity Enablement	ITECS-side network, identity, and integration support for the EHR pilot and rollout	17 – 28 hours
Multi-Site Backup Internet Audit & Remediation	Confirm and remediate redundant connectivity at every clinic location	8 – 20 hours
AWS HIPAA Data Warehouse Security Review	Independent review of the in-house data warehouse for HIPAA control alignment	8 – 14 hours
New Site Stand-Up Package (per clinic location, as needed)	Standardized clinic launch: ISP, firewall, switching, Wi-Fi, endpoints, M365 onboarding	11 – 21 hours / site

Hour ranges shown are total estimated effort per project, before the 15-hour Elite inclusion is applied. For projects landing near the lower end of each range, the included Elite hours absorb a significant portion of the work.

Why ITECS

- **Local Dallas partnership.** Headquartered in Plano, Texas. We are minutes from your Dallas corporate facility, which supports a real partnership cadence including in-person Quarterly Business Reviews and ad hoc executive conversations.
- **23 years of focus.** Founded in 2002 and exclusively focused on serving Dallas–Fort Worth and broader Texas mid-market organizations across regulated industries, including healthcare.
- **Co-managed by design.** ITECS operates a structured co-managed model. Your internal field technician will receive an agent license in our Halo PSA platform, with the ability to view, create, assign, close, and escalate tickets, and full access to the RMM, EDR, MDR, and security dashboards used to manage your environment.
- **HIPAA and compliance fluency.** Extensive HIPAA experience, Business Associate Agreement execution as standard practice, and an active program pursuing CMMC Level 2 certification. Our practices align to NIST, PCI, and HIPAA frameworks.

- **Built to scale alongside you.** Our typical client profile is 75 to 500 employees. We have the depth of bench, project capacity, and standardized new-site stand-up playbook to support Star Sleep & Wellness's path from today's footprint to 20-plus locations.
- **Forward-looking by design.** Active AI consulting practice supporting law firms, medical practices, and CMMC clients with secure, governed adoption of mainstream AI productivity tools, custom RAG agents, and in-house LLM hosting where data sensitivity warrants.
- **Hosted cloud option.** ITECS operates a Dallas-area data center near George Bush Turnpike and US-75. Should Star Sleep & Wellness wish to evaluate consolidating any of the on-premises server footprint into a managed private cloud, that conversation can be opened at any point during the engagement.

Service Level Commitments

Metric	Target
Coverage Hours (Extended)	7:00 AM – 10:00 PM CT, 7 days per week
Sophos MDR Security Monitoring	24 hours per day, 7 days per week, 365 days per year
Critical Incident Response	Within 1 hour
Standard Response	Within 4 hours
Uptime Commitment	99.9% target on ITECS-managed infrastructure

MSP Elite clients receive priority queue placement on all support requests. Critical incidents — those that materially impact clinical operations, patient access, or environment-wide availability — are escalated immediately to the assigned Elite team and Technical Account Manager.

Hourly Rates for Work Beyond Included Scope

Standard MSP Elite hourly rates apply to Special Project hours beyond the 15-hour inclusion, work outside contracted scope, and any project work completed prior to the formal project SOW. Star Sleep & Wellness, as an enrolled Elite client, receives a 15% loyalty discount on Special Project overage rates.

Service Level	Scheduled	After-Hours (1.5x)	After-Hours Emergency (2.0x)
Level 1 — General support	\$205.00	\$307.50	\$410.00
Level 2 — Network / systems	\$260.00	\$390.00	\$520.00
Level 3 — Architecture / AI / strategy	\$295.00	\$442.50	\$590.00

Special Projects are defined as discrete tasks reasonably expected to exceed 16 hours of effort, as deemed by ITECS. Each Special Project SOW will identify the included 15 hours, the estimated hour range, and the applicable rate for any overage.

Assumptions and Exclusions

- **Asset count true-up.** Recurring monthly investment is based on the asset profile discussed during the May 22 discovery call. Final counts and pricing will be confirmed during onboarding, with adjustment expected within plus or minus fifteen percent of the figures shown.
- **Service radius.** Onsite support is included within a 20-mile radius of the ITECS Plano office. Onsite support beyond 20 miles, and especially beyond 100 miles, may incur travel surcharges per the ITECS service policy. North Carolina and other multi-state locations will rely on a combination of remote support, the internal field technician, and pre-arranged onsite dispatch when needed.
- **Business Associate Agreement.** A HIPAA Business Associate Agreement will be executed alongside the Master Services Agreement before any protected health information is accessed.
- **Excluded from recurring investment.** Hardware and software procurement, third-party licensing not specifically listed, structured cabling and low-voltage work at new sites, ISP and telecommunications contracts, EHR vendor support, and any work outside the agreed scope of services. All such items are quoted separately.
- **Project work.** Special Projects are quoted separately via Statement of Work, with the included 15 project hours applied as the first deduction against the project estimate.

Next Steps

1. Review this proposal with Star Sleep & Wellness leadership, including the Chief Financial Officer.
2. Schedule a follow-up working session — preferred format is an in-person meeting at ITECS HQ in Plano, with the Chief Financial Officer in attendance.
3. Confirm preferred term length (1, 3, or 5 years) and any adjustments to the asset profile or Phase 1 project priorities.
4. Optional technical deep-dive with an ITECS engineer to refine asset counts and project scope before contract execution.
5. Execute the ITECS Master Services Agreement, Exhibit A (Scope of Services and Compensation), and HIPAA Business Associate Agreement.
6. Kick off the 30-day onboarding playbook with Star Sleep & Wellness's internal team and the incumbent provider.

Thank you for the opportunity to partner with Star Sleep & Wellness. We look forward to delivering the kind of structured, transparent, and growth-oriented IT partnership your organization deserves.

Proposal valid through June 30, 2026. Questions or revisions: Brian Desmot | bdesmot@itecsonline.com | (214) 444-7884 ext. 700
